

SEO Action Plan — Institute for Integrative Therapies

<https://www.iit-mn.com>

Generated: March 7, 2026 **Current SEO Health Score:** 52 / 100 **Target SEO Health Score:** 75 / 100 (achievable in 90 days)

🚨 CRITICAL — Fix Immediately (Week 1)

These issues block indexing, limit crawlability, or eliminate entire rich result categories.

C1 — Fix robots.txt 403 Error

Impact: Technical SEO (crawlability) | **Effort:** Low

Problem: `/robots.txt` returns 403 Forbidden. Googlebot cannot read crawl directives. Per Google's documentation, a 403 on robots.txt may trigger temporary crawl suspension. All AI crawlers (GPTBot, ClaudeBot, PerplexityBot) are also affected.

Fix: 1. In Cloudflare dashboard → Security → WAF → add a firewall rule to bypass WAF for requests to `/robots.txt` 2. Or: In Cloudflare → Security → Bots → ensure verified bots (Googlebot) are not blocked 3. Verify fix: `curl -A "Mozilla/5.0 (compatible; Googlebot/2.1)" https://www.iit-mn.com/robots.txt`

Minimum robots.txt content:

```
User-agent: *
Allow: /

User-agent: Googlebot
Allow: /

# Allow AI crawlers
User-agent: GPTBot
Allow: /

User-agent: ClaudeBot
Allow: /

User-agent: PerplexityBot
Allow: /

Sitemap: https://www.iit-mn.com/sitemap.xml
```

C2 — Generate and Submit XML Sitemap

Impact: Indexability | **Effort:** Low

Problem: No XML sitemap accessible at any standard path. Google must discover all pages through link-following alone, risking missed pages (staff bios, condition pages once created).

Fix: 1. In Webflow: Site Settings → SEO → enable "Auto-generate sitemap" 2. Verify sitemap renders at `https://www.iit-mn.com/sitemap.xml` 3. Submit to Google Search Console: Index → Sitemaps → enter sitemap URL 4. Add `Sitemap: https://www.iit-mn.com/sitemap.xml` to robots.txt

C3 — Implement Homepage Schema (MedicalClinic + LocalBusiness)

Impact: Schema, AI Search, Local SEO | **Effort:** Low

Problem: Zero structured data detected sitewide. The homepage lacks the foundational MedicalClinic + LocalBusiness schema required for local Knowledge Panel, map pack eligibility, and AI Overview citations.

Fix: Add the following JSON-LD in a `<script type="application/ld+json">` block in the Webflow page `<head>` custom code section:

```
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": ["MedicalClinic", "MedicalBusiness", "LocalBusiness"],
      "@id": "https://www.iit-mn.com/#clinic",
      "name": "Institute for Integrative Therapies",
      "alternateName": "IIT",
      "description": "Minnesota's first psychedelic medicine clinic offering ketamine infusions, ketamine-assisted psychotherapy (KAP)",
      "url": "https://www.iit-mn.com",
      "telephone": "+16512808774",
      "address": {
        "@type": "PostalAddress",
        "streetAddress": "9300 Hennepin Town Rd, Suite 110",
        "addressLocality": "Eden Prairie",
        "addressRegion": "MN",
        "postalCode": "55347",
        "addressCountry": "US"
      },
      "geo": {
        "@type": "GeoCoordinates",
        "latitude": "44.8408",
        "longitude": "-93.4708"
      },
      "medicalSpecialty": ["Psychiatry", "Addiction Medicine", "Pain Management"],
      "priceRange": "$$",
      "paymentAccepted": "Insurance, Cash, CareCredit",
      "sameAs": [
        "https://www.facebook.com/psychedelictherapymn/",
        "https://thethirdwave.co/directory/clinics/ketamine/minnesota/institute-for-integrative-therapies/",
        "https://healingmaps.com/listing/institute-for-integrative-therapies-eden-prairie-minnesota-clinic/",
        "https://psychedelic.support/network/the-institute-for-integrative-therapies/",
        "https://www.psychologytoday.com/us/therapists/institute-for-integrative-therapies-eden-prairie-mn/1040745"
      ]
    },
    {
      "@type": "WebSite",
      "@id": "https://www.iit-mn.com/#website",
      "url": "https://www.iit-mn.com",
      "name": "Institute for Integrative Therapies",
      "publisher": { "@id": "https://www.iit-mn.com/#clinic" }
    }
  ]
}
```

Validate at: <https://search.google.com/test/rich-results>

C4 — Rewrite All 14 Title Tags with Geo-Keywords

Impact: On-Page SEO, Local SEO, CTR | **Effort:** Low

Problem: Every title tag omits geographic keywords. This is a critical failure for a local medical clinic where conversion queries are geo-specific ("ketamine therapy Minnesota," "ketamine clinic Eden Prairie").

Fix in Webflow: Each page → SEO Settings → Title

Page	New Title
Homepage	Ketamine Clinic Eden Prairie MN \ Institute for Integrative Therapies
About	About Our Ketamine Clinic in Minnesota \ IIT
Ketamine Infusions	Ketamine Infusion Therapy Minnesota \ IIT
KAP	Ketamine-Assisted Psychotherapy (KAP) Eden Prairie \ IIT
KAP Externship	KAP Guided Externship for Therapists \ IIT Minnesota
KAP Intro	Intro to KAP: Ketamine Therapy Training for Therapists \ IIT
Dr. Doss	Dr. Manoj Doss, DO – Addiction Medicine & Ketamine \ IIT
Contact	Contact IIT – Ketamine Clinic Eden Prairie MN
Pricing	Ketamine Therapy Cost & Pricing \ IIT Eden Prairie MN
Get Started	Start Ketamine Therapy in Minnesota \ IIT

FAQ	Ketamine Therapy FAQs – Common Questions Answered \ IIT
Research	Ketamine & Psychedelic Research Program \ IIT Minnesota
News	Psychedelic Medicine News & Media \ IIT Minnesota
Training	Ketamine-Assisted Psychotherapy Training \ IIT

C5 — Write Custom Meta Descriptions for All Pages

Impact: CTR, YMYL trust signals | **Effort:** Low

Problem: No custom meta descriptions on any page. Google auto-generates snippets that lack CTA, location, insurance information, and conversion signals.

Fix in Webflow: Each page → SEO Settings → Meta Description

Priority 5 pages:

Page	Meta Description
Homepage	Minnesota's first psychedelic medicine clinic. Ketamine infusions, KAP, and SPRAVATO in Eden Prairie, MN. In-network with BCBS, Cigna, Aetna & more. Call (651) 280-8774.
KAP	Ketamine-Assisted Psychotherapy (KAP) combines ketamine with psychotherapy for lasting relief from depression, PTSD, and anxiety. Serving Eden Prairie & the Twin Cities.
Pricing	Ketamine infusions from \$500/session. In-network with Blue Cross Blue Shield, Cigna, Aetna, Ucare, and HealthPartners. Financing available through CareCredit.
FAQ	Answers to common questions about ketamine therapy in Minnesota — treatment process, insurance, costs, and what to expect. Call IIT at (651) 280-8774.
Dr. Doss	Dr. Manoj Doss, DO is a board-certified Addiction Medicine specialist and founder of IIT — Minnesota's leading ketamine and psychedelic-assisted therapy clinic.

🔴 HIGH PRIORITY — Fix Within 2 Weeks

H1 — Add FAQPage Schema to /faq/ and Key Service Pages

Impact: Rich results, AI Overview eligibility | **Effort:** Low

Add JSON-LD FAQPage schema (see full code in FULL-AUDIT-REPORT.md Section 4.4) to: - /faq/ — primary FAQ page - /healing/ketamine-assisted-psychotherapy/ — KAP-specific FAQs - /pricing/ — insurance and cost FAQs

H2 — Add Physician Schema to Staff Pages

Impact: E-E-A-T, YMYL trust | **Effort:** Low

Add Physician JSON-LD schema (see FULL-AUDIT-REPORT.md Section 4.3) to: - /staff/manoj-doss/ — priority 1 - /staff/ranji-varghese/ — priority 2 - All other staff bio pages

H3 — Add BreadcrumbList Schema Sitewide

Impact: SERP URL display, site structure signals | **Effort:** Medium (requires per-page or template implementation)

Implement via Webflow embed on each page or inject via a sitewide script. Follow pattern in FULL-AUDIT-REPORT.md Section 4.5.

H4 — Noindex /legal/opt-out-preferences/ and Review /covid-19/

Impact: Crawl budget, indexability quality | **Effort:** Very Low

- /legal/opt-out-preferences/ : Add `<meta name="robots" content="noindex, follow">` in Webflow page settings
- /covid-19/ : Either update with current information, 301 redirect to /faq/, or noindex

H5 — Audit and Fix Core Web Vitals

Impact: Rankings, user experience | **Effort:** Medium

1. Temporarily allow PageSpeed Insights bot or run from inside network
2. Identify LCP element (likely hero image) — add `loading="eager"`, explicit `width / height`
3. Add `<link rel="preconnect" href="https://fonts.googleapis.com">` if Google Fonts used
4. Audit third-party scripts — defer/async all non-critical scripts
5. Enable WebP image format in Webflow site settings

H6 — Fix Internal Linking Structure

Impact: Authority distribution, E-E-A-T | **Effort:** Low-Medium

Action	Pages Involved
Link Dr. Doss staff page from KAP, Ketamine Infusions, and Research pages	4 pages
Link FAQ from Pricing, Get Started, and KAP pages	4 pages
Link Research page from About and KAP pages	3 pages
Link Training section from About page	2 pages
Link Get Started from Pricing page	2 pages

H7 — Embed On-Site Patient Testimonials

Impact: Trustworthiness, conversion | **Effort:** Medium

- Embed Google Reviews widget on homepage and key service pages
- Create a `/patient-stories/` page with consented anonymized patient narratives
- Add `AggregateRating` schema once on-site reviews are embedded

H8 — Add MedicalTherapy Schema to Service Pages

Impact: Treatment-level entity understanding | **Effort:** Low

Add `MedicalTherapy` or `MedicalProcedure` JSON-LD to: - `/healing/ketamine-infusions/` - `/healing/ketamine-assisted-psychotherapy/` - Future `/healing/spravato/` page

H9 — Add Content Review Dates and Medical Disclaimers

Impact: YMYL compliance | **Effort:** Low

- Add "Last reviewed by [Dr. Name], [Month Year]" to footer of all service and FAQ pages
- Add brief outcome variability disclaimer to service pages: "Results vary. Ketamine therapy is not appropriate for all patients. Schedule a consultation to determine if you are a candidate."
- Surface HIPAA notice link in site footer

🔴 MEDIUM PRIORITY — Fix Within 30 Days

M1 — Create Condition-Specific Landing Pages

Impact: Organic search traffic, conversions | **Effort:** High (content creation)

Highest priority pages to create:

1. `/conditions/treatment-resistant-depression/` — largest search volume, strongest evidence base
2. `/conditions/ptsd/` — high search demand; IIT has clinical trial credibility
3. `/conditions/anxiety/` — broad search intent; good conversion potential
4. `/conditions/chronic-pain/` — already a separate pricing tier; deserves its own page

5. `/conditions/addiction/` — Dr. Doss's board specialty; significant content authority opportunity

Minimum page structure for each: - H1: "Ketamine Therapy for [Condition] in Minnesota" - What is [condition] and why standard treatments fail - How ketamine works for [condition] (mechanism + evidence) - IIT's approach (bio-psycho-spiritual model) - What to expect (4-phase protocol) - Is ketamine right for you? (candidacy criteria) - FAQ section (with FAQPage schema) - CTA: Schedule a free discovery call

M2 — Create Dedicated SPRAVATO Page

Impact: Organic traffic, REMS compliance | **Effort:** Medium

Create `/healing/spravato/` covering: - What is SPRAVATO (esketamine)? - FDA approval and REMS program requirements - Eligibility: treatment-resistant depression + current antidepressant - In-office administration requirements - Insurance coverage (distinct from IV ketamine) - Comparison with IV ketamine infusions

M3 — Launch Original Blog with Physician Bylines

Impact: Authoritativeness, AI citations, long-tail traffic | **Effort:** High (ongoing)

Recommended first 6 articles: 1. "What to Expect During Your First Ketamine Infusion at IIT" 2. "How Ketamine Differs from SSRIs for Treatment-Resistant Depression" 3. "Ketamine-Assisted Psychotherapy vs. Ketamine Infusions: Which Is Right for You?" 4. "IIT's Research Partnerships: What Phase 3 Clinical Trials Mean for Patients" 5. "Understanding Insurance Coverage for Ketamine Therapy in Minnesota" 6. "Minnesota's Psychedelic Medicine Landscape in 2026"

Requirements: All articles must have physician byline (Dr. Doss or Dr. Varghese), publication date, last-reviewed date, and references to research sources.

M4 — Create `/insurance/` Standalone Page

Impact: Trustworthiness, conversion | **Effort:** Medium

Create `/insurance/` covering: - In-network insurers: BCBS, Cigna, Aetna, Ucare, HealthPartners - What's covered vs. what's out-of-pocket - Pre-authorization process - Out-of-network reimbursement path - CareCredit 0% financing (6-month terms) - Step-by-step: how to use insurance at IIT

M5 — Add Course Schema to Training Pages

Impact: Rich results for professional audience | **Effort:** Low

Add `Course` JSON-LD to: - `/training/intro-to-kap/` - `/training/kap-guided-externship/`

M6 — Configure Security Headers via Cloudflare

Impact: Technical security score | **Effort:** Low-Medium

In Cloudflare Transform Rules, add response headers: - `Strict-Transport-Security: max-age=31536000; includeSubDomains` - `X-Content-Type-Options: nosniff` - `X-Frame-Options: SAMEORIGIN` - `Referrer-Policy: strict-origin-when-cross-origin`

M7 — Add Remaining Staff Bio Pages

Impact: E-E-A-T, team authority | **Effort:** Medium

Confirm and complete bio pages for all 12 team members. Currently named staff without confirmed `/staff/[name]/` pages: Allyson, Olivia, Amie, Abbie Shain. Each page should include: full name + credentials, specialties, populations served, training, and `Physician` or `Person` schema.

🕒 LOW PRIORITY — Backlog (30-90 Days)

L1 — Create `/patient-stories/` Page

Consented, anonymized patient narratives with specific conditions, treatment modality, and outcomes. Cite the Star Tribune story as proof of concept.

L2 — Create /research/publications/ Page

List Dr. Doss as co-author or PI on any published papers. Include ClinicalTrials.gov NCT numbers for active trials. This is a direct E-E-A-T signal.

L3 — Create Minnesota Psychedelic Policy Resource Page

Own the informational niche for Minnesota's psychedelic medicine regulatory landscape. The MN Department of Health Psychedelic Medicine Task Force is active; IIT is a natural authority source.

L4 — Add /llms.txt File

Create `/llms.txt` listing key pages and their summaries for AI model discovery. This emerging standard is increasingly adopted by healthcare and professional service sites.

L5 — Optimize Google Business Profile

Ensure GBP NAP (Name/Address/Phone) matches schema markup exactly. Add services, photos, Q&A, and posts. Respond to all existing reviews. This is the primary local pack ranking signal.

L6 — Add WebSite SearchAction Schema

Adds sitelink search box eligibility in Google. Already included in C3 homepage schema block above — verify rendering after C3 implementation.

L7 — Create /conditions/grief-and-loss/ and /conditions/end-of-life-anxiety/

Niche differentiators backed by Star Tribune coverage and clinical experience. Lower search volume but high authority and conversion potential.

Score Projections

Timeline	Actions Completed	Projected Score
Current	None	52/100
Week 1	C1-C5 completed	~60/100
Week 2	+ H1-H4	~65/100
Month 1	+ H5-H9	~70/100
Month 3	+ M1-M7	~78/100
Month 6	+ L1-L7 + blog cadence	~85/100

Quick Reference Checklist

Week 1 (Critical)

- ☐ C1: Fix robots.txt 403 in Cloudflare
- ☐ C2: Enable sitemap in Webflow + submit to GSC
- ☐ C3: Add MedicalClinic + LocalBusiness schema to homepage
- ☐ C4: Rewrite all 14 title tags with geo-keywords
- ☐ C5: Write meta descriptions for all pages

Week 2 (High)

- ☐ H1: Add FAQPage schema to /faq/ and service pages
- ☐ H2: Add Physician schema to all staff bio pages
- ☐ H3: Add BreadcrumbList schema sitewide
- ☐ H4: Noindex /legal/opt-out-preferences/ + review /covid-19/

- [] H9: Add content review dates and medical disclaimers

Month 1

- [] H5: CWV audit and image/font optimization
- [] H6: Fix internal linking structure (5 actions)
- [] H7: Embed on-site patient testimonials + AggregateRating schema
- [] H8: Add MedicalTherapy schema to service pages
- [] M5: Add Course schema to training pages
- [] M6: Configure security headers in Cloudflare

Month 2-3

- [] M1: Create condition-specific landing pages (start with Depression + PTSD)
- [] M2: Create dedicated SPRAVATO page
- [] M3: Launch blog — publish first 3 articles with physician bylines
- [] M4: Create /insurance/ standalone page
- [] M7: Complete remaining staff bio pages

Month 3-6 (Backlog)

- [] L1-L7: Patient stories, publications page, GBP optimization, llms.txt
