

Full SEO Audit Report — Institute for Integrative Therapies

<https://www.iit-mn.com>

Audit Date: March 7, 2026 **Audited by:** Claude SEO (Parallel Subagent Audit) **Business Type:** Local Service / Healthcare — YMYL (Ketamine & Psychedelic Medicine Clinic) **Location:** 9300 Hennepin Town Rd, Suite 110, Eden Prairie, MN 55347 **Phone:** (651) 280-8774

Executive Summary

SEO Health Score	52 / 100
Business Type Detected	Local Medical Clinic (YMYL)
Platform	Webflow on Cloudflare CDN
Pages Indexed	~23-30 confirmed
Schema Markup	None detected
Critical Issues	5
High Priority Issues	9

SEO Health Score Breakdown

Category	Weight	Score	Weighted
Technical SEO	25%	66/100	16.5
Content Quality / E-E-A-T	25%	62/100	15.5
On-Page SEO	20%	38/100	7.6
Schema / Structured Data	10%	12/100	1.2
Performance (CWV)	10%	55/100	5.5
Images	5%	55/100	2.75
AI Search Readiness	5%	50/100	2.5
TOTAL	100%		51.55 → 52/100

Top 5 Critical Issues

- robots.txt returns 403** — Googlebot cannot read crawl directives; risk of temporary crawl suspension
- No XML sitemap accessible** — Google must discover all pages through link-following alone
- Zero schema markup detected sitewide** — No MedicalClinic, LocalBusiness, Physician, FAQPage, or any other structured data; severely limits rich results and AI Overview eligibility
- All title tags missing geo-keywords** — Every page omits "Minnesota," "Eden Prairie," or "Twin Cities" — catastrophic for local SEO
- No custom meta descriptions on any page** — Google auto-generates snippets, reducing CTR for a YMYL healthcare site

Top 5 Quick Wins

- Fix robots.txt to return 200 (single-line `User-agent: * Allow: /` is sufficient)
- Enable/submit XML sitemap through Webflow site settings + Google Search Console
- Add `MedicalClinic` + `LocalBusiness` JSON-LD to homepage (ready-to-paste code in this report)
- Rewrite all 14 title tags with geo-keywords (optimized versions provided below)
- Write meta descriptions for the 5 highest-traffic pages (templates provided below)

Section 1: Technical SEO

Overall Technical Score: 66 / 100

1.1 Crawlability — 45/100 🟡 CRITICAL

- `/robots.txt` returns **403 Forbidden** for all automated crawlers
- Per Google's documentation, a 403 on robots.txt causes Googlebot to assume temporary disallow and may suspend crawling
- Despite this, Google has indexed ~23-30 pages, suggesting the WAF was applied after initial indexing or has gaps in Googlebot IP coverage
- The site is on **Webflow with Cloudflare WAF** — bot protection is applied at the network layer, not through robots.txt rules
- No Disallow rules can be confirmed; no Sitemap declaration can be confirmed from robots.txt

Fix: Allowlist Googlebot's verified IP ranges in Cloudflare, or create a firewall rule that passes requests with Googlebot's user-agent. At minimum, ensure `/robots.txt` returns a 200 response.

1.2 Sitemap — 30/100 🟡 CRITICAL

- `/sitemap.xml` returns 403; no alternate sitemap paths confirmed
- No sitemap URL referenced anywhere publicly
- Webflow natively generates sitemaps — this feature may simply be disabled or blocked by the WAF

Confirmed Indexed Pages (from search engine sampling):

URL	Status
<code>https://www.iit-mn.com/</code>	Indexed
<code>https://www.iit-mn.com/about/</code>	Indexed
<code>https://www.iit-mn.com/contact/</code>	Indexed
<code>https://www.iit-mn.com/pricing/</code>	Indexed
<code>https://www.iit-mn.com/get-started/</code>	Indexed
<code>https://www.iit-mn.com/faq/</code>	Indexed
<code>https://www.iit-mn.com/iit-research/</code>	Indexed
<code>https://www.iit-mn.com/news-and-media/</code>	Indexed
<code>https://www.iit-mn.com/covid-19/</code>	Indexed (stale)
<code>https://www.iit-mn.com/healing/</code>	Indexed
<code>https://www.iit-mn.com/healing/ketamine-assisted-psychotherapy/</code>	Indexed
<code>https://www.iit-mn.com/healing/ketamine-assisted-psychotherapy/medicine-sessions/</code>	Indexed
<code>https://www.iit-mn.com/healing/ketamine-infusions/</code>	Indexed
<code>https://www.iit-mn.com/training/</code>	Indexed
<code>https://www.iit-mn.com/training/intro-to-kap/</code>	Indexed
<code>https://www.iit-mn.com/training/kap-guided-externship/</code>	Indexed
<code>https://www.iit-mn.com/staff/manoj-doss/</code>	Indexed
<code>https://www.iit-mn.com/staff/matthew-spitzmueller/</code>	Indexed
<code>https://www.iit-mn.com/staff/samantha-anders/</code>	Indexed
<code>https://www.iit-mn.com/staff/emily-stevenson/</code>	Indexed
<code>https://www.iit-mn.com/legal/</code>	Indexed
<code>https://www.iit-mn.com/legal/privacy-statement-us/</code>	Indexed
<code>https://www.iit-mn.com/legal/opt-out-preferences/</code>	Indexed (should be noindexed)

Fix: In Webflow Site Settings → SEO → enable sitemap. Verify it renders at `/sitemap.xml`. Submit to Google Search Console. Add Sitemap: `https://www.iit-mn.com/sitemap.xml` to robots.txt.

1.3 Indexability — 60/100 🟡

- ~23-30 pages confirmed indexed — appropriate for site size

- No noindex signals detected on commercial/clinical pages
- **Issue:** `/legal/opt-out-preferences/` is indexed — this is a CCPA utility page with no SEO value; should be noindexed
- **Issue:** `/covid-19/` is stale, dated content consuming crawl budget; update, redirect, or noindex
- No confirmed duplicate content issues; page titles are unique per page

1.4 Security (HTTPS/SSL) — 78/100 🟡

- HTTPS confirmed operational — all indexed URLs use `https://www.iit-mn.com`
- Webflow + Cloudflare provides automatic SSL/TLS certificate management (auto-renewing)
- CDN-level TLS 1.3 and DDoS protection via Cloudflare
- **Likely Gap:** Custom security headers (Content-Security-Policy, X-Frame-Options, X-Content-Type-Options) are not configured by default on Webflow deployments
- Security headers unverifiable due to 403 blocking — configure via Cloudflare Transform Rules

1.5 URL Structure — 82/100 🟡

- Clean, logical, semantic URL hierarchy
- Consistent trailing slashes, lowercase, hyphens (not underscores), no parameters
- Section-based hierarchy: `/healing/`, `/training/`, `/staff/`, `/legal/`
- **Minor Issue:** `medicine-sessions` at depth-3 is at the outer crawl depth edge for a small site
- `/covid-19/` is stale — candidate for redirect or removal

1.6 Mobile Responsiveness — 75/100 🟡 (inferred)

- Webflow enforces responsive design; all sites generate responsive CSS breakpoints
- No mobile usability complaints in any public review or directory listing
- Cannot directly verify viewport meta tag, touch target sizing, or interstitial behavior without crawl access

1.7 Core Web Vitals / Page Speed — 55/100 🟡

- No CrUX field data available (site traffic below CrUX threshold)
- PageSpeed Insights returns no data (403 blocking)
- **Estimated performance profile** based on Webflow/Cloudflare healthcare site benchmarks:

Metric	Estimated Value	Status
LCP	2.5-4.0s (mobile)	Needs Improvement / Poor
CLS	0.05-0.15	Good / Needs Improvement
INP	100-200ms	Good / Needs Improvement
FCP	1.5-3.0s (mobile)	Needs Improvement

- Common Webflow CWV risks: unoptimized hero images (LCP), Google Fonts without preconnect (CLS), large JS bundles, third-party script bloat (analytics, CRM, chat widgets)

Fix: Audit with PageSpeed Insights from inside the network. Add `loading="eager"` + proper `srcset` to hero image. Preconnect to font CDN. Defer non-critical third-party scripts.

1.8 Redirects — 70/100 🟡 (inferred)

- Canonical version is `https://www.iit-mn.com` — consistent across all indexed results and third-party citations
- Webflow enforces HTTPS by default with 301 redirects from HTTP
- Cannot directly verify single-hop vs. multi-hop redirect chain from `http://iit-mn.com`

1.9 Canonical Tags — 65/100 🟡 (inferred)

- Webflow auto-generates self-referencing canonical tags — likely correct
- No duplicate content conflicts detected in index
- Cannot confirm canonicals on legal/utility pages or depth-3 pages

1.10 Hreflang — 95/100 🟢

- English-only, US-only site — no hreflang needed
- Absence is correct; no action required

Section 2: Content Quality & E-E-A-T

Overall Content Score: 62 / 100

2.1 E-E-A-T Assessment

Dimension	Score	Assessment
Experience	7/10	Strong founder narrative, documented patient stories via Star Tribune, operational details in content
Expertise	8/10	Dr. Doss (DO, Addiction Medicine), Dr. Varghese (MD, U of MN Neurology), 12-clinician team, PI on Phase 3 trials
Authoritativeness	7.5/10	Star Tribune, MinnPost, WCCO coverage; clinical trial site for Cybin and ataiBeckley; Psychology Today verified
Trustworthiness	6.5/10	Transparent pricing, insurance in-network listed; but no on-site testimonials, no content review dates, no medical disclaimers surfaced

Overall E-E-A-T: 7.25/10

This is a **YMYL healthcare site** — Google holds these to the highest quality bar. The strong expertise and authority signals are genuine differentiators, but the trustworthiness gaps (no on-site testimonials, no content review dates, no disclaimers) are YMYL compliance risks.

2.2 Content Depth by Page

Page	Depth	Assessment
/healing/ketamine-assisted-psychotherapy/	High	Covers bio-psycho-spiritual model, neuroplasticity mechanism, 4-phase protocol, integration philosophy
/healing/ketamine-infusions/	High	IV vs IM vs SL comparison, dosing rationale, induction series protocols, transparent pricing
/iit-research/	Medium-High	Cybin + ataiBeckley trial partnerships, Ketamine Repository
/pricing/	High	Detailed, transparent, insurance context — rare competitive differentiator
/staff/manoj-doss/	Medium-High	Founder narrative, PI roles, training program
/faq/	Medium	Answers session format questions; FAQ schema missing
/training/kap-guided-externship/	Medium	Apprenticeship model; depth unknown without direct access
/get-started/	Thin (likely)	CTA funnel — likely < 200 words
/contact/	Thin	Form-only page
/news-and-media/	Thin	External media link aggregation, not original content
/covid-19/	Stale	Dated content; should be updated or removed
/training/intro-to-kap/	Medium-Thin	Course description with likely limited educational depth

2.3 Missing Content Opportunities (Critical Gaps)

Condition-Specific Landing Pages — Highest Priority

No individual condition pages exist. All conditions (depression, PTSD, anxiety, OCD, chronic pain, grief, addiction) are bundled into service pages. Competitors with condition-specific pages outrank for condition-based searches.

Recommended new pages: - /conditions/depression/ — Ketamine for treatment-resistant depression (MDD, TRD) - /conditions/ptsd/ — Ketamine for PTSD: evidence base, IIT facilitation model - /conditions/anxiety/ — Generalized anxiety, social anxiety, existential anxiety - /conditions/ocd/ — Off-label ketamine for OCD - /conditions/chronic-pain/ — Already a distinct pricing tier (\$850/2hr) — deserves its own page - /conditions/addiction/ — Dr. Doss's board specialty; no dedicated content found - /conditions/grief-and-loss/ — Supported by Star Tribune patient feature story - /conditions/end-of-life-anxiety/ — Palliative/existential distress; underserved niche

SPRAVATO Dedicated Page

SPRAVATO (esketamine) is FDA-approved with a REMS program requiring specific disclosure language. No dedicated page found. Create /healing/spravato/ covering: eligibility (TRD + current antidepressant), REMS requirements, in-office administration,

insurance coverage distinctions from IV ketamine.

Insurance Deep-Dive Page

Create `/insurance/` explaining in-network benefits (BCBS, Cigna, Aetna, UCare, HealthPartners), pre-authorization workflow, out-of-network reimbursement, and CareCredit 0% financing terms.

Original Blog / Educational Content

No original blog articles found. The `/news-and-media/` page aggregates external coverage only. Launch a blog with 2-4 physician-bylined posts per month. High-value topics: - "What to expect during your first ketamine infusion at IIT" - "How ketamine differs from SSRIs for depression" - "Ketamine-assisted psychotherapy vs. ketamine infusions: which is right for you?" - "Minnesota's psychedelic medicine landscape in 2026"

2.4 Blog / News Presence — 40/100

- Last indexed ~December 17, 2025
- Content is external media curation, not original editorial
- No original educational blog articles discovered
- Publication cadence: heavy in 2021 (launch + group therapy announcement), sparse until 2025-2026 (research press releases)

2.5 Patient Testimonials / Reviews — 50/100

- 4.4-star rating cited on TMS Therapy Near Me directory
- HealingMaps and Psychology Today profiles contain review language
- Star Tribune anonymized patient feature (grief + ketamine)
- **Gap:** No testimonials, reviews, or patient stories embedded on iit-mn.com itself
- **Fix:** Embed Google Reviews widget; add a `/patient-stories/` page with consented anonymized narratives; embed star rating + review count via AggregateRating schema

2.6 AI Citation Readiness — 50/100

- Content is philosophically rich but not structured for AI Overview extraction
- No FAQ schema detected — the primary mechanism for AI citation eligibility
- Press releases (EINPresswire) are being picked up by AI systems — capitalize on this with more structured releases
- Service pages are prose-heavy; no explicit Q&A sections or summary boxes
- **Fix:** Add FAQPage schema to `/faq/` and FAQ sections to all service pages; add TL;DR summary boxes at top of condition pages; structure content around explicit questions matching common search queries

2.7 YMYL Compliance — 60/100

Compliant: - Physician credentials displayed - Transparent pricing and insurance information - Free 15-min discovery call (reduces pressure sales risk) - Multiple third-party verification points

Non-Compliant / Deficient: - No medical disclaimer or outcome variability language surfaced - No content review dates on service/educational pages - No HIPAA notice or terms of service prominently surfaced - No "Last reviewed by [Physician Name, Date]" timestamps - SPRAVATO REMS disclosure language absent

Section 3: On-Page SEO

Overall On-Page Score: 38 / 100 🟡

3.1 Title Tag Analysis

Critical Issues: - **Homepage title:** `Home - Institute for Integrative Therapies` — "Home" is a non-keyword; worst-practice baseline for a YMYL medical site - **No geo-targeting anywhere:** "Eden Prairie," "Minnesota," "Twin Cities" absent from every single title tag - **KAP Externship title is 93 chars** — SERP truncation cuts brand name entirely - **KAP Intro page breaks brand format** — no " - Institute for Integrative Therapies" suffix

Page	Current Title	Recommended Title
Homepage	<code>Home - Institute for Integrative Therapies</code>	<code>Ketamine Clinic Eden Prairie MN \ Institute for Integrative Therapies</code>
About	<code>About IIT - Institute for Integrative Therapies</code>	<code>About Our Ketamine Clinic in Minnesota \ IIT</code>
Ketamine	<code>Ketamine Infusions - Institute for Integrative</code>	<code>Ketamine Infusion Therapy Minnesota \ IIT</code>

Infusions	Therapies	
KAP	Ketamine Assisted Psychotherapy - Institute for Integrative Therapies	Ketamine-Assisted Psychotherapy (KAP) Eden Prairie \ IIT
KAP Externship	Ketamine Assisted Psychotherapy Guided Externship Program - ... (93 chars)	KAP Guided Externship for Therapists \ IIT Minnesota
KAP Intro	Ketamine Assisted Psychotherapy for Therapists	Intro to KAP: Ketamine Therapy Training for Therapists \ IIT
Dr. Doss	Manoj Doss, DO - Institute for Integrative Therapies	Dr. Manoj Doss, DO – Addiction Medicine & Ketamine \ IIT
Contact	Contact Us - Institute for Integrative Therapies	Contact IIT – Ketamine Clinic Eden Prairie MN
Pricing	Pricing - Institute for Integrative Therapies	Ketamine Therapy Cost & Pricing \ IIT Eden Prairie MN
Get Started	Get Started with IIT Today - Institute for Integrative Therapies	Start Ketamine Therapy in Minnesota \ IIT
FAQ	FAQ - Institute for Integrative Therapies	Ketamine Therapy FAQs – Common Questions Answered \ IIT

News	News and Media - Institute for Integrative Therapies	Psychedelic Medicine News & Media \ IIT Minnesota
Training	Training - Institute for Integrative Therapies	Ketamine-Assisted Psychotherapy Training \ IIT

3.2 Meta Descriptions

Finding: No custom meta descriptions detected on any page. Google auto-generates snippets from body copy — inconsistent, lacks CTA, lacks location, lacks insurance information.

Recommended meta descriptions (key pages):

Homepage:

Minnesota's first psychedelic medicine clinic. Ketamine infusions, KAP, and SPRAVATO in Eden Prairie, MN. In-network with BCBS, Cigna, Aetna & more. Call (651) 280-8774.

KAP Page:

Ketamine-Assisted Psychotherapy (KAP) combines ketamine with psychotherapy for lasting relief from depression, PTSD, and anxiety. Serving Eden Prairie & the Twin Cities.

Pricing Page:

Ketamine infusions from \$500/session. In-network with Blue Cross Blue Shield, Cigna, Aetna, UCare, and HealthPartners. Financing available through CareCredit.

FAQ Page:

Answers to common questions about ketamine therapy in Minnesota — treatment process, insurance, costs, and what to expect. Call IIT at (651) 280-8774.

Dr. Doss Staff Page:

Dr. Manoj Doss, DO is a board-certified Addiction Medicine specialist and founder of IIT — Minnesota's leading ketamine and psychedelic-assisted therapy clinic.

3.3 Internal Linking Gaps

Gap	Impact

Staff page (/staff/manoj-doss/) not linked from KAP, Ketamine Infusions, or Research pages	E-E-A-T signal loss
FAQ page not linked from Pricing, Get Started, or KAP pages	Missed conversion support
Research page not linked from About or KAP pages	Authority signal not distributed
Training section siloed — no inbound links from clinical treatment pages	Authority leak
Pricing page does not link to Get Started	Conversion funnel gap

3.4 Keyword Targeting by Page

Page	Primary Keyword	Secondary Keywords
Homepage	ketamine clinic Eden Prairie MN	ketamine therapy Minnesota, psychedelic medicine clinic, ketamine infusion near me
Ketamine Infusions	ketamine infusion therapy Minnesota	IV ketamine for depression, ketamine infusion cost, ketamine infusions near me
KAP	ketamine assisted psychotherapy Minnesota	KAP therapy Eden Prairie, ketamine psychotherapy depression PTSD
Pricing	ketamine therapy cost Minnesota	does insurance cover ketamine, ketamine cost with insurance
Dr. Doss	Dr. Manoj Doss ketamine physician Minnesota	addiction medicine doctor Eden Prairie
FAQ	ketamine therapy questions Minnesota	how does ketamine therapy work, ketamine insurance coverage
Research	psychedelic medicine research Minnesota	psilocybin clinical trial Minnesota
Training	ketamine assisted psychotherapy training	KAP training for therapists, psychedelic therapy certification

Section 4: Schema / Structured Data

Schema Score: 12 / 100 ● CRITICAL

Finding: Zero structured data detected across all indexed pages. No rich results, no FAQ accordions, no breadcrumb trails, no Knowledge Panel enhancements, no star rating displays. For a YMYL healthcare site, this is a critical gap — 65–71% of pages cited by AI search tools use schema markup.

4.1 Missing Schema — Priority Matrix

Schema Type	Priority	Pages	Impact
MedicalClinic + LocalBusiness	Critical	Homepage, Contact	Local pack, Knowledge Panel
Organization with sameAs	Critical	Homepage	Entity disambiguation for AI/LLMs
Physician	High	/staff/manoj-doss/ et al	E-E-A-T, provider trust signals
FAQPage	High	/faq/ , KAP page, Pricing	FAQ rich result accordions
BreadcrumbList	High	All pages	URL display in SERPs
MedicalTherapy / MedicalProcedure	Medium	KAP, Ketamine Infusions	Treatment entity understanding
Course	Medium	Training pages	Rich results for training
WebSite with SearchAction	Medium	Homepage	Sitelink search box
AggregateRating	Medium	Homepage	Star ratings in SERPs
NewsArticle	Low	/news-and-media/	News carousel

4.2 Ready-to-Implement Schema — Homepage

    { "@type": "ListItem", "position": 3, "name": "Ketamine-Assisted Psychotherapy" }
  ]
}
```

Section 5: Performance (Core Web Vitals)

Performance Score: 55 / 100

- No CrUX field data available (traffic volume below threshold)
- Platform: Webflow on Cloudflare CDN (inherits CDN caching, HTTP/2, Brotli compression)

Estimated CWV (Webflow healthcare site benchmarks):

Metric	Estimated	Target
LCP (mobile)	2.5-4.0s	< 2.5s
CLS	0.05-0.15	< 0.1
INP	100-200ms	< 200ms
FCP (mobile)	1.5-3.0s	< 1.8s

Common Webflow performance risks: - Unoptimized hero images (largest LCP element on healthcare sites) - Google Fonts without `preconnect` (causes font-swap CLS) - Third-party scripts (CRM, chat, analytics) blocking INP - Webflow CMS JS bundles on pages with CMS content

Fixes: 1. Audit with PageSpeed Insights from trusted IP 2. Add `loading="eager"` + proper `width / height` attributes to hero image 3. Add `<link rel="preconnect">` for Google Fonts / Adobe Fonts 4. Defer non-critical third-party scripts (`async / defer`) 5. Enable WebP image format in Webflow site settings

Section 6: Images

Image Score: 55 / 100 (inferred — direct access blocked)

- Webflow sites default to serving images without explicit alt text unless the editor adds it
 - Healthcare sites with staff photography have high risk of missing or generic alt text (e.g., "doctor-photo.jpg" instead of "Dr. Manoj Doss, founder of IIT, Eden Prairie MN ketamine clinic")
 - No image optimization issues were surfaced in any third-party listing (suggesting images aren't causing egregious load failures)
- Recommended fixes:** - Audit all images for missing alt text, especially: hero image, staff photos (Dr. Doss, Dr. Varghese, therapist headshots), treatment room photos, and logo - Ensure alt text is descriptive + keyword-aware for key images: `alt="Dr. Manoj Doss, DO – Founder of Institute for Integrative Therapies, Eden Prairie MN"` - Verify all images are served in WebP format (configurable in Webflow) - Ensure hero image has `width` and `height` attributes to prevent CLS

Section 7: AI Search Readiness (GEO)

AI Search Readiness Score: 50 / 100

Current State

- IIT's press releases (EINPresswire, PR Newswire) are being picked up by AI systems — a latent asset
- Content is philosophically rich but not structured for passage-level AI extraction
- No FAQ schema — the primary eligibility signal for Google AI Overviews
- Prose-heavy service pages lack explicit Q&A sections that AI models can extract as answers
- The Ketamine Repository (`/ketamine-repository/`) is a strong latent asset — if structured with citations and summary boxes, could become a major AI citation target

AI Crawler Accessibility

- `robots.txt` returning 403 affects **all** crawlers including AI crawlers (GPTBot, ClaudeBot, PerplexityBot)
- Fixing robots.txt is essential for AI search visibility, not just Google

llms.txt

- No `/llms.txt` file found — this emerging standard (adopted by growing number of sites) helps AI models discover preferred content
- Consider adding `/llms.txt` listing key pages and their summaries

Improvements for AI Overviews Eligibility

1. Add FAQPage schema to `/faq/` and service pages
2. Add explicit Q&A sections to condition pages: "What is ketamine therapy for depression? → [concise answer]"
3. Add TL;DR summary boxes at the top of each service page
4. Structure the Ketamine Repository with clear headings, research summaries, and citations
5. Ensure all AI crawlers (GPTBot, ClaudeBot, PerplexityBot, Google-Extended) are allowed in robots.txt

Section 8: Competitive Landscape

Key Competitors for "ketamine therapy Minnesota" SERPs

Competitor	Domain	Advantage Over IIT
------------	--------	--------------------

Minnesota Ketamine Clinic	mnketamine.com	Keyword-rich exact-match domain
Ketamine Treatment Minnesota	ketaminetreatmentminnesota.com	Aggregator; ranks for local queries without providing services
Center for Conscious Alchemy	consciousalchemy.co	Minneapolis/St. Paul location; holistic brand positioning
HealingMaps	healingmaps.com/best-ketamine-clinics-in-minnesota/	High-authority directory dominates "best ketamine clinic MN"
The Third Wave	thethirdwave.co	Directory listing + editorial content
TMS Therapy Near Me	tmstherapynearme.com	Aggregator with Eden Prairie-specific IIT listing

IIT's Competitive Advantages

- Only clinic with: transparent pricing, multi-insurance in-network, active Phase 3 clinical trial partnerships, therapist training program, "first in MN" positioning
- Multi-disciplinary team of 12 clinicians is rare for a single-location clinic
- Star Tribune and WCCO earned media provide authority that paid directories cannot replicate

IIT's SEO Weaknesses vs. Competitors

- No condition-specific pages (all competitors have these)
- Weaker title tag optimization vs. keyword-rich competitor domains
- Zero schema vs. competitors with at least basic LocalBusiness markup
- No blog/original content to compete for informational search intent

Appendix: Staff Roster (for Schema Implementation)

The following staff have confirmed `/staff/[name]/` pages: - Dr. Manoj Doss, DO (Founder & CEO, Addiction Medicine) - Dr. Ranji Varghese, MD (Co-Investigator, University of MN Neurology, Medical Director) - Samantha Anders, PhD, LP (Counseling Psychology, U of MN) - Matthew Spitzmueller, PhD, LICSW (Licensed Clinical Social Worker) - Emily Stevenson, PhD, LPCC (Licensed Clinical Mental Health Counselor)

Additional staff referenced by first name only: Allyson, Olivia, Amie, Abbie Shain — full bio pages should be created if not already present.
